

F4-VELTRO *Pista*

23 Total Bikes

www.mv-agusta-club-schweiz.ch

- 185 hp
- Dry weight 159 kg.
- Max speed 307 km/h
- Engine with variable height intake ducts with torque shift system (tss)
- Lightened frame - Special graphic hand made on carbon fairing free from gloss with twining with military airforce logo that includes: front fairing for superbike - Tail fairing (single seat) for superbike - Right and left fairing for superbike - Lower fairing for superbike - Fuel tank for superbike - Air-box for superbike - Front carbon mudguard - Upper carbon chain cover - Lower racing carbon chain cover - Right and left carbon side panel for air-box
- Carbon exhaust guard - Instrument pack support - Right and left carbon air ducts - Rear carbon mudguard - Carbon heat shield - Carbon battery support for superbike - Magnesium frame parts: swing arm - Frame plates
- Lower triple clamp - Titanium open silencer + titanium open exhaust with eprom - Superlight breombo aluminium forged wheels - Over dimensioned radiator superbike - Forged aluminium heat exchanger - Forged aluminium steering head - Forged aluminium right and left half handlebar - Front disc "brembo racing" type double steel floating disc (320 mm.Ø - th. 6 mm.) with aluminum flange Solid-machined "brembo racing" type radial with four front brake calipers pistons
- Rear disc "brembo racing" type single steel disc 218 mm.Ø - Rear caliper support - Aluminium radial brake pump and clutch pump
- Adjustable right and left front footrest - Aluminium forged brake lever
- Front fork with carbonitriding treatment and aluminium brake lever
- Rear shock absorber with double high and low speed adjustment both in

compression and in rebound - Superbike instruments - Bicolour black and grey leather seats - Bike cover - Rear aluminium frontstand "corse - scatolato" - Silver plaque with the name of the customer and the number of the bike - Limited edition certificate
